

Smart Green Cities Investment Workshops

Financing for Sustainable Development

Overview

The Smart Green Cities Investment Workshops are designed by WGEO with the concrete objective of identifying and promoting investment opportunities and strategic projects with demonstrable green growth potential. Opportunities and projects that are bankable and ready to be presented to financiers across the world.

Participants will have the opportunity to attend the workshops together with representatives of WGEO State Members, international organizations, the private sector, universities, impact investment funds and international cooperation institutions, thereby leveraging a vast financing ecosystem as facilitated by WGEO.

These workshops will support the building of capacity to mainstream green economy objectives and policies into regional development planning processes and facilitating investments in priority sectors and regions for State Members.

Smart Green Cities Projects

WGEO, in collaboration with partner organizations, has identified a project pipeline of 60 bankable smart green cities projects worth US\$ 1.1 billion. Each project benefits from the explicit support of its host government and as such presents a competitive advantage to interested investors.

The pipeline will be developed in a series of tranches with the first tranche consisting of:

Investment Pipeline (First Tranche):

17
Projects

- Sustainable Transport : 5 projects
